
CI / CD Deployment for UdaPeople

Bringing people closer to UdaPeople

CI/CD Introduction

1. More Features

New features are released quicker as developers are able to collaborate more efficiently and rollout features quicker.

→ **Features**

More value features released more quickly.

→ **Users**

Higher user retention as employees feels appreciated.

2. More Security

Better detection of security vulnerabilities

as automated test cases for security vulnerabilities boost confidence.

→ **Security**

Prevent embarrassment or costly security holes that requires to be patched.

→ **Users**

Users will have higher confidence of their information being secured.

3. More Availability

Higher uptime of the UdaPeople as any errors with the new features or product upgrade can be rollback automatically.

→ **Availability**

Quick undo to return production to the previous working state.

→ **Users**

Users will enjoy more usage time on the product without any disruptions.
